

### **Spraywash XHD**

Is a heavy-duty highly alkaline cleaner with particular capabilities within processes requiring removal of rust and carbon deposits.

Spraywash XHD has found numerous applications in the re-manufacturing industries associated with automotive and passenger transport including the removal of flaking paintwork creating a blended edge ready for repainting.

Excellent degreasing properties also make Spraywash XHD ideal for food, brewing, marine and offshore industries. Always recommended to be incorporated within equipment where a final rinse is available.

Simple test kits allows the operators to check solution strengths which range from 3 – 10% dependent on levels of contaminants after representative testing.

The operating temperatures range from 65 - 90°C.

Packaging options available, 25 litre containers, 200 litre barrels and 1000 litre IBC (intermediate bulk containers)

For information on applications or to discuss a potential trial contact us at [info@sonikem.co.uk](mailto:info@sonikem.co.uk)
