

## *Product Data Sheet*

### **Technopol Plastic Cleaner**

Neutral low foam spray cleaner formulated for the light to medium contamination on a wide range of sensitive plastics, composites and ceramics.

Ideal for use in the remanufacturing of playground and park recreational equipment. Designed to resist the leaching of pigmentation and embrittlement of reclaimed plastic parts.

Technopol also incorporates an ability to resist the redeposition of contamination by static electrical charge.

Neutral Ph allows for foul sewer disposal only after consent is obtained from local water authorities.

Economical in use a concentration of 3 -5 %with good tank life. Best operating temperature 50 – 60 °c

Available in 25 litre and 200 litre barrels.
